

spicyglm fits the same model 22-279x faster than R spicyGLM()

A Faster at every dataset size (synthetic data)

Both on 1 core; median fitting time over repeated runs (5 spicyglm, 3 R), estimates match R. At 1M cells spicyglm also used 0.4 GB of memory vs 4.4 GB for R.
One laptop (Apple silicon, 10 cores, 24 GB).

B Real data: Schürch 2020 CRC (258k cells)
