

spicyglm fits the same model 22-485x faster than R spicyGLM()

A Faster at every dataset size (synthetic data)

Both on 1 core; median fitting time over repeated runs (5 spicyglm, 3 R), estimates match R. At 1M cells spicyglm also used 0.5 GB of memory vs 3.7 GB for R.
One laptop (Apple silicon, 10 cores, 24 GB).

B Real data: Schürch 2020 CRC (258k cells)
